

Aaryan Chouksey

B.Tech – Computer Science Engineering - MIT-WPU, Pune

@ aaryan2chouksey@gmail.com

Mobile : +91- 8989233333

Experience

Software Engineer - Zensar Technologies (Jun 2024 - Present)

- Develop casino games including but not limited to, slot games, video poker and jackpot games.
- Use core web development languages, i.e, HTML, CSS and JS to create games using internal game engines.
- Develop backend using .NET framework in C# for similar projects.

ReactJS Developer Intern - Sonnul - 3 months (Mar 2024 - May 2024)

- Worked on the UI of a Salesforce Integration application.
- Utilized previous knowledge of ReactJS library to make an impact in the project.
- Completed 20 major enhancements and bug fixes in 3-month duration.

Software Developer Intern - Teleglobal International - 6 months (Jul 2023 - Dec 2023)

- Immersed in MERN (MongoDB, Express.js, React, Node.js) stack development
- Used Jenkins, AWS EC2 and Github to build pipelines for CI/CD (DevOps).
- Contributed to feature enhancements and debug issues
- Collaborated within an Agile framework
- Proficient in Git, actively participated in code reviews to ensure code quality
- Honed skills in technical prowess, effective teamwork, and communication

Projects

Digital Business Card Generator and Manager

- Create and manage digital business cards effortlessly with the admin dashboard.

- Admins can add users' contact info, generating unique V-cards accessible via links and QR codes containing vcf data.
- Built with React for frontend, Node, Express, and MongoDB for backend and database, and Firebase for cloud storage, the platform streamlines networking by digitizing business cards for seamless sharing and storage.
- Demo credentials:
 - Link: digital-vcard.vercel.app
 - Email: demo@gmail.com
 - Password: demo@123
- View the generated V-cards through the link below:
<https://digital-vcard.vercel.app/vcard/{Company Name}/{Employee ID}>

MailMate

- MailMate is a Gmail-integrated dashboard built with ReactJS, allowing users to manage their emails efficiently.
- Users can group senders by email or domain, view email details, and delete emails directly. Seamless Gmail integration enables users to open emails in Gmail with a single click.
- Leverages Google's Gmail API for real-time data management.
- Project link: mail-mate.vercel.app

Trythat.ai

- Empower your property endeavors with instant access to vital registration data. This web application compiles comprehensive property listings for both commercial and residential buildings, facilitating lead generation for brokers.
- Developed during an internship with mentorship from senior developers, this industrial-grade project utilizes React, Node, Express, and MongoDB, hosted on AWS for seamless scalability and reliability.
- Project link: re.trythat.ai

Career Objectives

Passionate software engineer with a deep fascination for coding and exploring the mysteries of the Universe. Driven by curiosity, I seek innovative solutions that blend technology and science to solve complex challenges.

Extra-curriculars

- Member of Numerates Student Club
- Part of winning team of Sharekhan's Roarathon (Hackathon) Campus Edition 2023

Education

MIT World Peace University,
Pune— B.Tech Computer Engineering
2020 - 2024 (8.32 CGPA)

Skills

- JavaScript
- Python
- ReactJS
- ExpressJS
- NodeJS
- C#.NET
- MongoDB
- MySQL
- Github
- Jenkins
- HTML & CSS
